## Subject Index of Volume 33

- Acceleration measurements  
thin film PVDF sensors applied to high, 111
- Actuator structures  
relations between, and final-constraint minimum-energy problem, 175
- Ageing phenomena  
in heavily doped ( $p^+$ ) micromachined Si cantilever beams, 199
- Ageing study  
of NTC thermistors by thermopower measurements, 119
- Aluminium  
characterization of new device for pressure sensing; AlGaAs/GaAs TEGFET, 53  
electrical transport study of pseudomorphic heterostructures InGaAs–InAlAs on Si and InP substrates, 67
- Anisotropic etching  
measurements of, of single-crystal Si sphere in aqueous Cs hydroxide, 191  
modelling of, in Si-based sensor application, 103
- Arsenic  
characterization of new device for pressure sensing; AlGaAs/GaAs TEGFET, 53  
comparison of Si and GaAs integrated magnetotransistors, 57  
deep level analysis of undoped  $Ga_xIn_{1-x}P/GaAs$  single heterojunctions grown by MOMBE and MOVPE, 63  
electrical transport study of pseudomorphic heterostructures InGaAs–InAlAs on Si and InP substrates, 67
- Barrier properties  
of conducting poly(ethylene) with Au and Si, 85
- Bolometer  
design considerations of metal-film, with micromachined floating membrane, 183
- Cantilever beams  
aging phenomena in heavily doped ( $p^+$ ) micromachined Si, 199
- Cesium  
measurements of anisotropic etching of single-crystal Si sphere in aqueous Cs hydroxide, 191
- Chemical properties  
of electrochemically prepared polyaniline hexafluorophosphate (PAPF<sub>6</sub>), 107
- Chemical vapor deposition  
high-lifetime strained  $Si_{1-x}Ge_x$  films grown by rapid thermal, 29
- Chemical-vapour-deposited  
polysilicon films, oxygen adsorption and electrical behaviour of thin, very-low-pressure, 71
- Conducting Q1D materials  
with soft phonon mode, nonlinear optics of (A–B) conjugated polymers and role of electron–electron scattering in, 123
- Conjugated polymers  
nonlinear optics of (A–B), and role of electron–electron scattering in conducting Q1D materials with soft phonon mode, 123
- Contactless measurement  
of piezoresistive properties of heavily doped Si by IR reflectance, 39
- Dielectric induction motors  
torque–frequency characteristics of, 237
- Elastic wave sensors  
quartz technological channel and Si technology, 99
- Electrical behaviour  
oxygen adsorption and, of thin, very-low-pressure chemical-vapour-deposited polysilicon films, 71
- Electrical characteristics  
of W-contacts to 6H–SiC at temperatures between 300 and 950 K, 95
- Electrical properties  
of thin films and junctions of  $\beta$ -FeSi<sub>2</sub>, 81
- Electrical transport study  
of pseudomorphic heterostructures InGaAs–InAlAs on Si and InP substrates, 67
- Electron–electron scattering  
nonlinear optics of (A–B) conjugated polymers and, in conducting Q1D materials with soft phonon mode, 123
- Floating membrane  
design considerations of metal-film bolometer with micromachined, 183
- Flow sensor  
monolithic, for measuring millilitre per minute liquid flow, 143
- Fluxgate sensors  
review, 129
- France  
integrated Si-based sensors; basic research activities in, 1
- Gallium  
characterization of new device for pressure sensing; AlGaAs/GaAs TEGFET, 53  
comparison of Si and GaAs integrated magnetotransistors, 57  
deep level analysis of undoped  $Ga_xIn_{1-x}P/GaAs$  single heterojunctions grown by MOMBE and MOVPE, 63  
electrical transport study of pseudomorphic heterostructures InGaAs–InAlAs on Si and InP substrates, 67
- Germanium  
high-lifetime strained  $Si_{1-x}Ge_x$  films grown by rapid thermal chemical vapor deposition, 29
- Gold  
barrier properties of conducting poly(ethylene) with Au and Si, 85  
new model for interaction mechanism at Au–Si interface, 97
- Hall generators  
use of inter-electrode commutation for elimination of non-Hall voltages in inhomogeneous, 167
- Hinges  
microfabricated, 249

**Hydrogen**

- PECVD Si nitrides with low hydrogen content, 25
- photodetector for, and water vapour, 115

**Indium**

- deep level analysis of undoped  $\text{Ga}_x\text{In}_{1-x}\text{P}/\text{GaAs}$  single heterojunctions grown by MOMBE and MOVPE, 63
- electrical transport study of pseudomorphic heterostructures  $\text{InGaAs-InAlAs}$  on Si and InP substrates, 67
- optimization of InP/SiO<sub>2</sub> interface treatment by  $(\text{NH}_4)_2\text{S}_x$  for InP MISFET fabrication technology, 33

**Induction motors**

- torque-frequency characteristics of dielectric, 237

**Infrared properties**

- of thin films and junctions of  $\beta\text{-FeSi}_2$ , 81

**Infrared reflectance**

- contactless measurement of piezoresistive properties of heavily doped Si by, 39

**Interaction mechanism**

- new model for, at Au-Si interface, 97

**Inter-electrode commutation**

- use of, for elimination of non-Hall voltages in inhomogeneous Hall generators, 167

**Iron**

- IR and electrical properties of thin films and junctions of  $\beta\text{-FeSi}_2$ , 81

**Liquid density sensing**

- by using photothermal vibration, 163

**Liquid flow**

- monolithic flow sensor for measuring millilitre per minute, 143

**LPCVD-SOI substrates**

- rapid thermal annealing of, for sensor applications, 77

**Magnetically driven microactuators**

- case for, 207

**Magnetotransistors**

- comparison of Si and GaAs integrated, 57

**Materials science**

- future of sensors, or software engineering?, 5

**Microactuators**

- case for magnetically driven, 207

**Microfabricated hinges, 249****Microgripper**

- polysilicon, 221

**Micromechanical resonators**

- mechanisms of optical activation of, 229

**Microsensor technology**

- porous Si as material in, 19

**Minimum energy problem**

- relations between actuator structures and final-constraint, 175

**MISFET fabrication technology**

- optimization of InP/SiO<sub>2</sub> interface treatment by  $(\text{NH}_4)_2\text{S}_x$  for InP, 33

**MOMBE**

- deep level analysis of undoped  $\text{Ga}_x\text{In}_{1-x}\text{P}/\text{GaAs}$  single heterojunctions grown by, and MOVPE, 63

**MOVPE**

- deep level analysis of undoped  $\text{Ga}_x\text{In}_{1-x}\text{P}/\text{GaAs}$  single heterojunctions grown by MOMBE and, 63

**Nonlinear optics**

- of (A-B) conjugated polymers and role of electron-electron scattering in conducting Q1D materials with soft phonon mode, 123

**NTC thermistors**

- ageing study of, by thermopower measurements, 119

**Optical activation**

- mechanisms of, of micromechanical resonators, 229

**Optical sensors applications**

- advances in semiconductor materials and structures for, 47

**Oxygen adsorption**

- and electrical behaviour of thin, very-low-pressure chemical-vapour-deposited polysilicon films, 71

**PECVD**

- Si nitrides with low hydrogen content, 25

**Photodetector(s)**

- for hydrogen and water vapour, 115
- UV, in 6H-SiC, 91

**Photothermal vibration**

- liquid density sensing by using, 163

**Physical properties**

- of electrochemically prepared polyaniline hexafluorophosphate (PAPF<sub>6</sub>), 107

**Piezoelectric properties**

- characterization of, of Zn oxide thin films deposited on Si for sensor applications, 43

**Piezoresistive properties**

- contactless measurement of, of heavily doped Si by IR reflectance, 39

**Polyaniline hexafluorophosphate**

- chemical and physical properties of electrochemically prepared PAPF<sub>6</sub>, 107

**Poly(ethylene)**

- barrier properties of conducting, with Au and Si, 85

**Pressure sensing**

- characterization of new device for AlGaAs/GaAs TEGFET, 53

**Pressure sensors**

- temperature compensation of piezoresistive, 155

**PVDF sensors**

- thin film, applied to high acceleration measurements, 111

**Quartz**

- elastic wave sensors — quartz technological channel and Si technology, 99

**Resonators**

- mechanisms of optical activation of micromechanical, 229

**Semiconductor materials**

- advances in, and structures for optical sensors applications, 47

**Silicon**

- aging phenomena in heavily doped ( $\text{P}^+$ ) micromachined Si cantilever beams, 199
- barrier properties of conducting poly(ethylene) with Au and Si, 85
- characterization of piezoelectric properties of Zn oxide thin films deposited on Si for sensors applications, 43
- comparison of Si and GaAs integrated magnetotransistors, 57
- contactless measurement of piezoresistive properties of heavily doped Si by IR reflectance, 39
- electrical characteristics of W-contacts to 6H-SiC at temperatures between 300 and 950 K, 95

- electrical transport study of pseudomorphic heterostructures InGaAs-InAlAs on Si and InP substrates, 67
- high-lifetime strained  $\text{Si}_{1-x}\text{Ge}_x$  films grown by rapid thermal chemical vapor deposition, 29
- integrated Si-based sensors; basic research activities in France, 1
- IR and electrical properties of thin films and junctions of  $\beta\text{-FeSi}_2$ , 81
- measurements of anisotropic etching of single-crystal Si sphere in aqueous Cs hydroxide, 191
- modelling of anisotropic etching in Si-based sensor application, 103
- new model for interaction mechanism at Au-Si interface, 97
- optimization of InP/SiO<sub>2</sub> interface treatment by  $(\text{NH}_4)_2\text{S}_x$  for InP MISFET fabrication technology, 33
- oxygen adsorption and electrical behaviour of thin, very-low-pressure chemical-vapour-deposited polysilicon films, 71
- polysilicon microgripper, 221
- porous Si as material in microsensor technology, 19
- UV photodetectors in 6H-SiC, 91
- Silicon nitrides
  - PECVD Si nitrides with low hydrogen content, 25
- Silicon technology
  - elastic wave sensors — quartz technological channel and, 99
- Software engineering
  - future of sensors, materials science or, 5
- TEGFET
  - characterization of new device for pressure sensing; AlGaAs/GaAs, 53
- Temperature compensation
  - of piezoresistive pressure sensors, 155
- Thermal annealing
  - rapid, of LPCVD-SOI substrates for sensor applications, 77
- Thermistors
  - ageing study of NTC, by thermopower measurements, 119
- Thermopower measurements
  - ageing study of NTC thermistors by, 119
- Torque-frequency characteristics
  - of dielectric induction motors, 237
- Tungsten
  - electrical characteristics of W-contacts to 6H-SiC at temperatures between 300 and 950 K, 95
- UV photodetectors
  - in 6H-SiC, 91
- Water vapour
  - photodetector for hydrogen and, 115
- Zinc oxide
  - characterization of piezoelectric properties of Zn oxide thin films deposited on Si for sensors applications, 43
